

ePOD

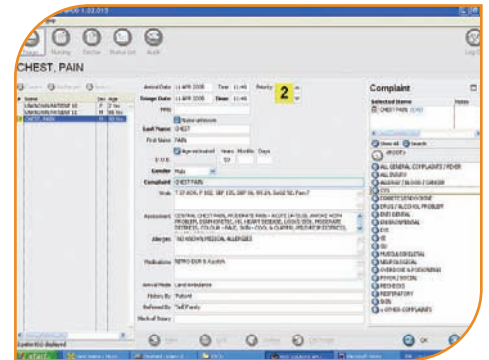

Your complete Emergency Department charting solution

From triage to disposition, ePOD provides the charting and decision support tools required by today's busy emergency nurses and physicians. Designed by emergency clinicians for emergency clinicians, ePOD will help your staff make better decisions, all the while providing the tools for them to quickly and legibly chart their recordings.

ePOD is a cost-effective solution designed to make your emergency department safer and more productive through the innovative utilisation of efficient and easy to use complaint driven, five level triage templates.

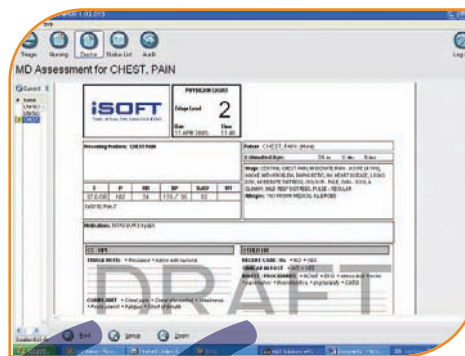

ePOD includes:

- Electronic 5-level triage with built in decision support and automatic assignment of triage level, providing support in all triage situations
- Triage "whiteboard" providing the triage nurse with access to electronic lists of both current and discharged patients
- Complaint, age and gender specific ED nurse charts
- Complaint, age and gender specific ED physician charts
- Comprehensive Discharge Instructions package
- Reports & audit capability

Triage Management

Selecting from over 300 easily accessible age and gender specific presenting complaints, triage nurses are provided with proper assessment questions. Built in decision support automatically helps all triage nurses assign the correct triage level to every patient.

Physician Charting

With over 250 age and gender specific charts, documentation becomes fast, easy and more legible.

The iSOFT ePOD system has improved the quality of charting in our ED. The clear format makes chart reviews a pleasure.

Dr. C. Bourdon, Director, Emergency Medicine Residency Program, Sudbury

ePOD

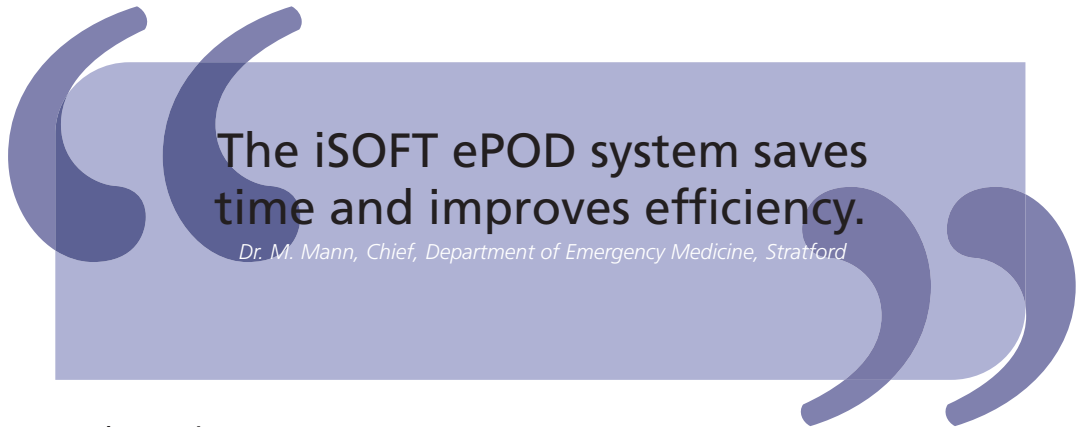

Your complete Emergency Department charting solution

Nurse Charting

Over 100 age and gender specific nursing charts are available within ePOD. The standardised layout of the data capture supports faster, safer charting and facilitates follow-up QA activities. Less time spent charting means more time at the bedside.

Discharge Instructions

A comprehensive set of discharge instructions extends the reach of ePOD to the patient. The extensive range of follow up instructions, school and work notes improve patient compliance, understanding and helps to manage risk.

The iSOFT ePOD system saves time and improves efficiency.

Dr. M. Mann, Chief, Department of Emergency Medicine, Stratford

Implementation

The stand-alone ePOD application can be implemented using a simple "plug and play" process. There are minimal training requirements. Technical assistance can be provided where necessary. ePOD can be installed and operational within a matter of days!
